

Greetings, Community!

We have to say that we're loving how Eleven01 is steadily becoming part of the larger picture for blockchain in India. Our mission, to put it into words, is to be a conduit between developers, enterprises, and tech enthusiasts, and blockchain technology, as a means to materialising /creating immutable, transparent, secure blockchain applications to cater to real-world use cases, bringing blockchain to the next billion users.

We are working on upping our game by expanding our networks, building the Eleven01 community, and creating a holistic blockchain protocol that can further our vision. Our Telegram community is steadily increasing in numbers: from 20K members since our last newsletter update, our community grew 3x with over 64,000 members. We feel encouraged and motivated to work toward scaling up India's native blockchain protocol.

Let us walk you through everything that we accomplished this July to get closer to accomplishing our goals.

Partnerships

Pipra Solutions' Realmeds

Adding to our list of super-awesome partnerships is one with Pipra Solutions – solution provider working to enable the larger adoption for emerging technologies like Blockchain. Eleven01 and Pipra Solutions will work together to bring to life Realmeds – a dApp that will enable efficient and seamless processing in the supply chain for drugs and pharmaceuticals.

Authorito Capital

Eleven01 signed a Memorandum of Understanding (MoU) with Authorito Capital to facilitate growth and development within the blockchain sector. Authorito is an early-stage investment fund for blockchain projects. As the company has a great foothold in the Middle East and Southeast Asia, they help each of their portfolio companies to explore growth and partnerships in this geography.

"Dear Eleven01 Community,

We're working hard at Eleven01 to grow our networks. I believe in the power of collaboration and that's what this industry needs; in fact, when bitcoin was successfully created, it involved the combined efforts of a varied set of talented individuals including the enigmatic Satoshi Nakamoto. It all began with great and able minds coming together to build something meaningful and something that affects change. Drawing from this, I believe that our efforts to join hands with players from different industry verticals will build India's native blockchain protocol as one that is robust, diverse, and provides solutions to several areas. The Eleven01 Developer Team are preparing for some very exciting hackathons and competitions. We'll keep you posted on the Eleven01 official communication channels and perhaps, in the next newsletter. Until then, stay connected with us. We truly value your encouragement, patience, and overall support."

Eleven01 at Events

India Meet-UDAMLp

The Eleven01 team attended a DAML meet-up organised by Digital Asset at Idea Labs in Hyderabad. DAML is a programming language that facilitates the creation of smart contracts for distributed business workflows. Digital Asset is spearheading the development of DAML to create business solutions. We believe that this would be a valuable resource in furthering the Eleven01 Protocol and possibly make way for a partnership between Digital Asset and Eleven01. Talia Klien, Product Manager at Digital Asset, and Meetanshu Wadhwa, Technical Sales Engineer, APAC, at Digital Asset, led the workshop.

DCentrum's Deep Dive into Distributed Ledgers

Rama Iyer, CTO and President of Eleven01, was a KeyNote Speaker at DCentrum's Deep Dive into Distributed Ledgers. He spoke about the scope of Blockchain as an emerging technology and how Eleven01 is using blockchain to provide solutions in both public and private workloads. DCentrum is a co-learning community that was started by a group of young and passionate technology enthusiasts in Hyderabad, India. With a strong belief in democracy and decentralization, this group aspires to build communities on various decentralization technologies and contribute to the next wave of technology stack after the Internet.

The CII Event

Rama Iyer was part of a panel discussion titled Trends, Opportunities & Threats in the Blockchain Industry. He shared his views about relevant industry topics: how the cryptocurrency space started with bitcoin and evolved to what it is now; blockchain technology and the usecases that it can cater to; security in blockchains; the best consensus algorithms for blockchain. He shared the stage with some prominent industry people: Sainath Gupta, CEO of Primetrade AI; Dr Santanu Paul, Managing Director from Talentsprint; Pavan Adipuram, Founder and CEO of ChitMonks.

The Entrepreneurship World Cup

Rama Iyer was part of the jury of the Entrepreneurship World Cup Hyderabad Regional Finals on the 18th July, 2019 at 91springboard - Hitech Kondapur. The Entrepreneurship World Cup (EWC) is an initiative of MISK (the Prince Mohammed bin Salman bin Abdulaziz Foundation), in partnership with the Global Entrepreneurship Network and The Global Education & Leadership Foundation (IGELF). EWC is a global accelerator that aims to develop over 100,000 startups (over 100 countries) by bringing together the world's top entrepreneurs, mentors, investors and educational resources. The National Finals was a culmination of a dedicated search for India's top entrepreneurs following a series of 7 Regional Finals. The winning teams will get the chance to represent India at the Global Finals in Riyadh, Saudi Arabia on 12th November 2019.
