

## Greetings,

Yet another exciting month wrapped up at Eleven01!

We have been making continuous progress to build a product focused blockchain ecosystem that will help us realize our vision of bringing blockchain to the next billion people.

In May, we doubled down on our efforts to build a strong and supportive community. This led to a 10X increase in our community size and we are happy to announce that Eleven01 has a Telegram community of **17,000+ active members**, who are eagerly waiting to invest in Eleven01. The immense growth of our community in such a short amount of time even took us by surprise and shows the support levels we have for the project across the globe.

Speaking of being backed up by a strong blockchain community, we have news on the Eleven01 bounty program. We released the Bounty Leaderboards with the results of several participants spreading the word about Eleven01 and its mission on several social media platforms. We congratulate all the participants, and we are ever thankful for the Eleven01 community for their continued support.

Finally, we are happy to share that Eleven01 has been selected into the prestigious Microsoft ScaleUp Program to build our product tightly integrated with Azure and its middleware services.

Here's to an exciting future!

## From the Eleven01 Leadership

"Dear Eleven01 Family,

In the last edition of our newsletter, I alluded to a game-changing development for Eleven01 and this month I am excited to share with you that now we have officially become an enterprise partner of Microsoft and have also been selected into Microsoft for ScaleUp program. This speaks volumes about the work we have accomplished so far, our growth plans and our future potential as a viable business. Moreover, this is yet another accolade for the rockstar team we have built here at Eleven01. As a Microsoft alum, I understand well the benefits of having access to the largest enterprise partner ecosystem globally and I fully intend to leverage this new relationship to expand our product suite and create finely tuned go to market strategies. I will be sharing more details as and when possible.

Moreover, May saw Consensus 2019 take place. This was my fourth year attending this conference and I can tell that this year, the attendees were looking for real projects with real viable business models. A lot of institutional support with enterprises showing up in greater numbers. I spoke as part of a panel at an event organized by 100X Advisors You can check out the Events section below for more details.

Lots of good things happening here at Eleven01. Stay tuned for the next update. See you in July.

- Ausaf Ahmad, CEO of Eleven01

Dear Community,

Our journey towards building Eleven01 is getting better and better. Our network is expanding and we're bringing onboard several partners, and we're collaborating to build better-equipped applications and products with blockchain technology. In May, we released some exciting partnerships. We're working with ICRISAT and KHETHINEXT to build a dApp that can help farmers increase their productivity and reduce dependencies on middlemen. You can read more about such partnerships in the following sections.

In the month of May, we also conducted a blockchain workshop with HYSEA as a part of their Tech Series Deep Dive Sessions. It was a great experience meeting several people who were interested in learning how to build blockchain-based applications. Every month, we're working on expanding Eleven01 and making it a robust, scalable blockchain protocol.

- Rama Iyer, President and CTO of Eleven01

## Partnerships

## ICRISAT &amp; KHETHINEXT

We are joining hands with the International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) and KHETHINEXT—platform enables digital agriculture transformation— to explore challenges in the agriculture sector in India that blockchain technology can cater to. With the aim of forging an industry partnership to bolster technological innovation in the agriculture sector, ICRISAT will provide us with incubation support to our Centre of Excellence (CoE). Eleven01 will assist KHETHINEXT to develop a decentralized application (dApp) that will help farmers improve their productivity in terms of logistics, access to expert advice, and a mobile platform that can facilitate these.

## Automaxis

The Eleven01 team has partnered with Automaxis, a blockchain-based automation company, to traverse through the potentials of the blockchain technology in automating trade flow. In alliance with Eleven01, Automaxis will attempt at reducing the operational time and error in international trade through India's native blockchain protocol. It will generate digitised and blockchain Bills of Lading on the Eleven01 protocol for faster flow of trade.

## Learnitude

We signed a Memorandum of Understanding (MoU) with Learnitude Technologies. According to this MoU, the team at Learnitude will work closely with the Eleven01 team towards building a partnership that will facilitate growth and development within the blockchain sector. Our partnership will focus on exploring the potential of Blockchain as a Service (BaaS). We will assist Learnitude to build prospective Decentralised applications (DApps) for their clientele across several enterprises from multiple verticals.

## How can blockchain help secure our data?

One of the biggest problems that blockchain technology solves is providing security via transparency and immutability. And considering that we're living "data-centric" times, blockchain infrastructure offers the betterment of data security. However, with that said, how does blockchain technology secure our data? Read about it here: [Read more](#).

## Eleven01 at Events

As a dedicated team, we're making sure that we are present at the most significant blockchain gatherings from around the world to build the Eleven01 network both locally and globally.

## Consensus New York 100x Crypto World Tour

Ausaf Ahmad attended Coin Desk's Consensus and was part of a panel discussion moderated by the hosts of the Bad Crypto Podcast - Joel Comm and Travis. He shared the stage with Ian Balina - Partner at 100X Advisors and YouTuber, Tone Vays - Content Creator, Derivatives Trader & Consultant, and OhHeyMatty - Blockchain Trader, YouTuber and Consultant. At the panel discussion, he shared his insights on the Bitcoin price fluctuation, the rise of the IEO trend, the Binance Hack, and more.

[You can watch the panel discussion here.](#)

## HYSEA Tech Series Deep Dive Session on Blockchain, Hyderabad

Eleven01 conducted a workshop in association Hyderabad Software Enterprises Association (HYSEA) on 24 May 2019 at Club Botanika, Hyderabad. The workshop introduced a crowd of 30+ engineers and students to the world of blockchain through the Eleven01 Protocol. Rama Iyer began the workshop with a Tech Talk about blockchain as an emerging technology and about Eleven01 as a platform enabling blockchain development.

The workshop was carried forward by Eleven01's very own blockchain engineers - Rajesh and Parag Rahangdale. They walked the audience through the process of building a decentralised application on the Eleven01 Protocol. The session turned out to be an engaging learning experience.

## NASSCOM Technology &amp; Leadership Forum (NTLF)

Rama Iyer - CTO and President of Eleven01 - spoke at a panel discussion titled "Blockchain in 2019: From Hype to hope" at the NTLF. He expounded on the blockchain as a technology aside from cryptocurrencies - one of the many use cases it supplements, and blockchain adoption among countries especially for governance. He shared the stage with some prominent people from various industry verticals: Akshay Khanna - Global Lead, Avasant Labs; Abhijit Singh - Head of Technology Group, ICICI Bank; Jorge Lesmes - Global Head of the Blockchain Banking practice, ICICI Bank; an NTT DATA Company; Lucia Real-Martin - Director, ACCA.

The NASSCOM and Leadership Summit was a three-day event (20 - 22 Feb) with the theme "The Next: Opportunity vs Reality. The conference focused on building dialogue and building though-leadership around innovation in emerging technology, the opportunities that they provide from both a business and a social angle.

[You can watch the panel discussion here.](#)

Eleven01 continues to forge new partnerships and build bridges across the globe in pursuit of bringing blockchain to the masses. Check out the details below and don't hesitate to share your feedback with us over our social media channels.

Regards,  
The Eleven01 Team
